## ABSTRACT:

PROBLEM TO BE SOLVED: To make a customer freely select and edit contents and content materials with copyright and to deliver/distribute them after processing the copyright or the like.

SOLUTION: A user terminal 3 is provided with a WWW browser for displaying a WWW document issued by a sample content **server** 2 on a screen, an order input means for making the customer order work contents according to the **guidance** of the WWW document and an editing instruction input means for making the customer edit original contents sample-displayed after the order through a WWW browser **image**. The sample content **server** 2 controls the WWW browser **image**, processes the contract clauses of the payment of the copyright fee of the ordered work or the like, then executes an editing instruction and delivers the original contents after the editing. An original content **server** 1 with the copyright intensively manages the original contents and supplies them to the sample

content **server** 2.
